Data Modelling and Form Design

Aim

To design and develop a Gym Membership Management Form using Zoho Creator by creating a structured form, applying appropriate validations, and generating a report for managing gym membership records.

Theory

Data modelling and form design involve organizing data into suitable fields and sections for efficient collection and management. In Zoho Creator, forms can be created using different field types such as Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, Multi Select, and Checkbox.

In this experiment, a Gym_Membership_Form is designed to collect member details, contact information, membership and fitness preferences, and scheduling and health declaration details. The form is divided into four sections: Member Details, Contact Details, Membership & Fitness Preferences, and Scheduling & Health Declaration.

Validations are applied to ensure accurate data entry, including mandatory member details, valid email and phone formats, suitable age values, compulsory membership plan and preferred start date, and compulsory fitness declaration and liability waiver. The submitted data is displayed in the Gym_Membership_Report for review and membership management.

Procedure

1 Open Zoho Creator and create the Gym Membership Management application.

2 Create the Gym_Membership_Form.

3 Add the required fields for member, contact, membership, fitness, scheduling, and health declaration details.

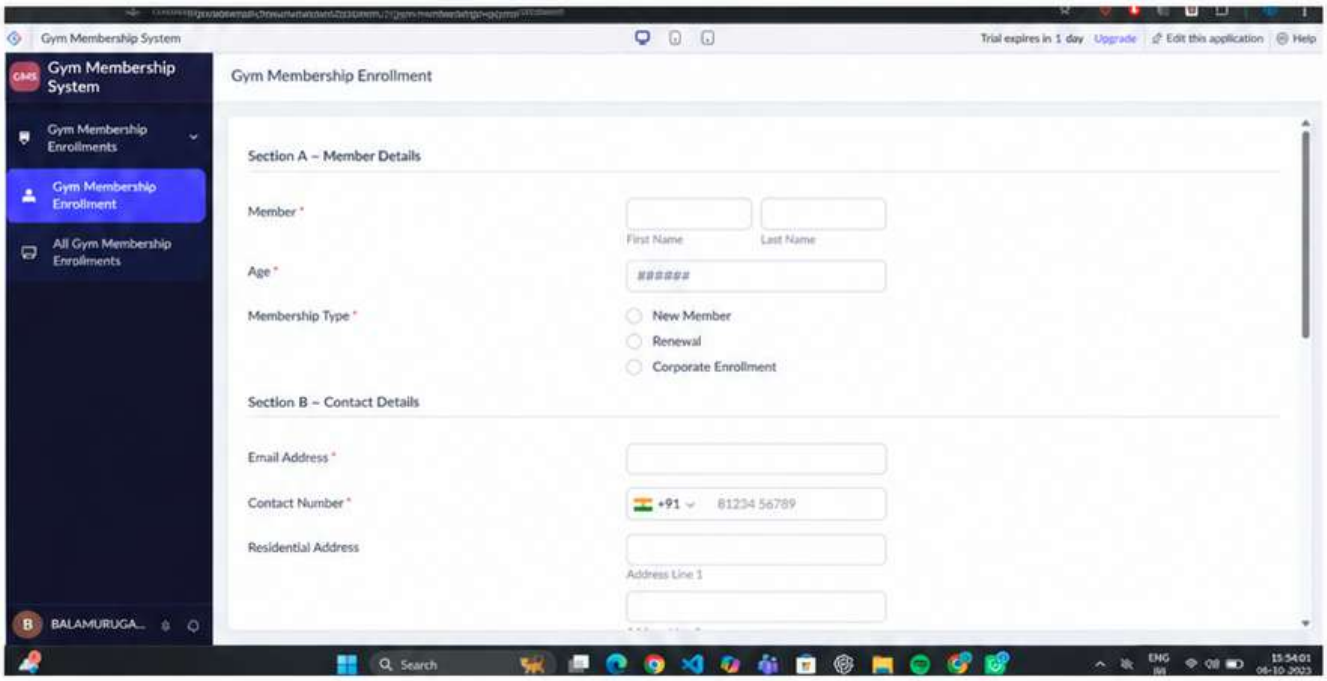

4 Organize the fields into the four specified sections.

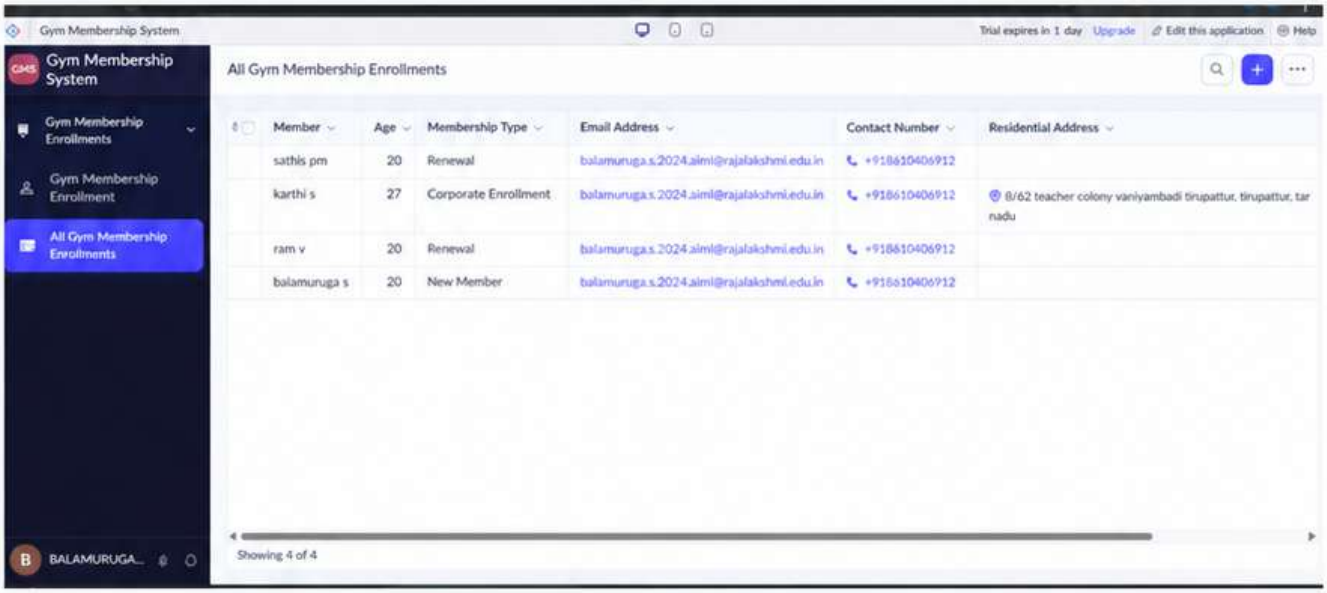

5 Configure mandatory fields and apply the required validation rules.

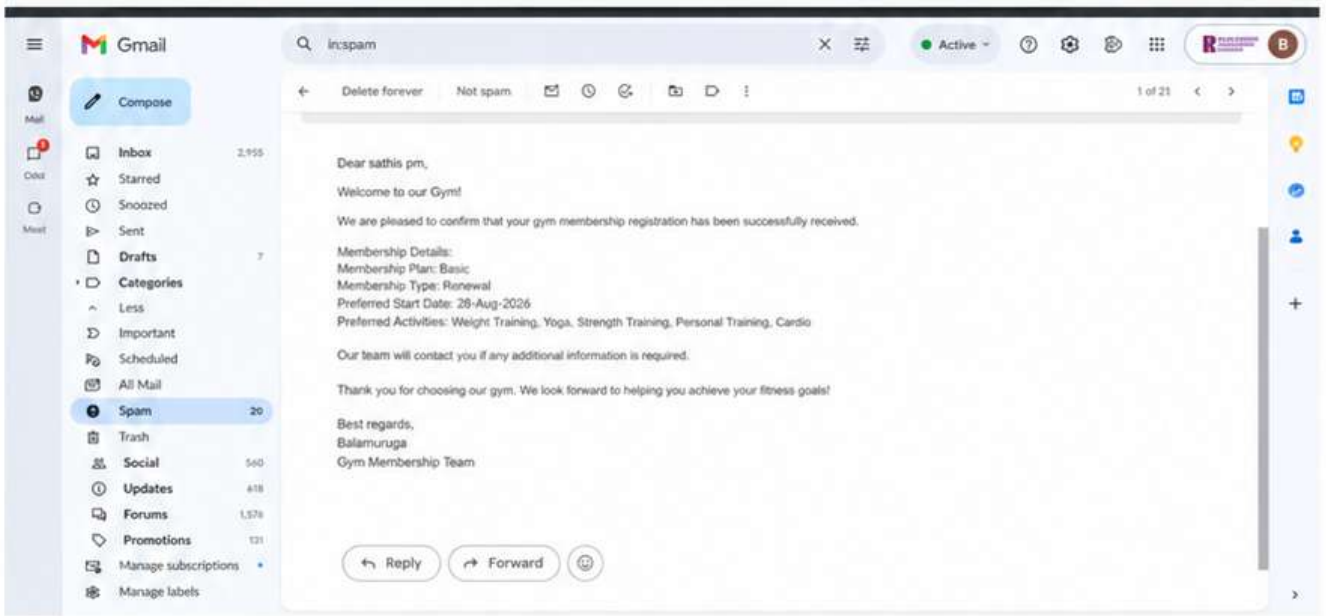

6 Save and preview the form.

7 Enter sample member details and submit the form.

8 Create the Gym_Membership_Report and verify the submitted rec

Result

The Gym Membership Management Form was successfully created in Zoho Creator with a structured data model, appropriate field validations, and organized sections. The submitted member records were successfully stored and displayed in the Gym_Membership_Report for effective review and gym membership management.
