

EXPERIMENT 8: USER MANAGEMENT AND ROLE-BASED ACCESS CONTROL

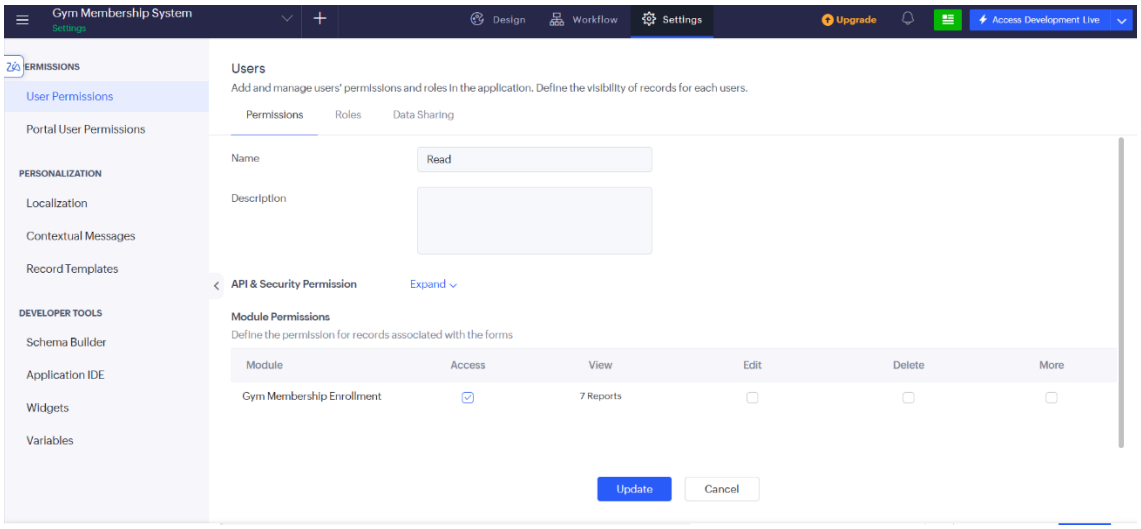

Aim

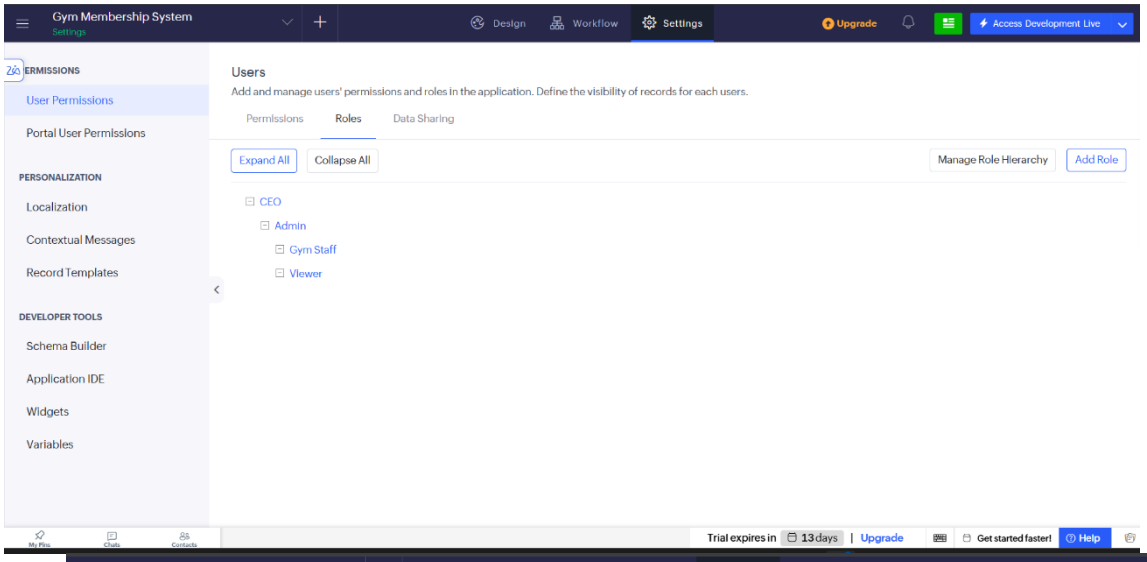

To implement user management and Role-Based Access Control (RBAC) in Zoho Creator by creating user roles and configuring permissions to control access to application forms and reports.

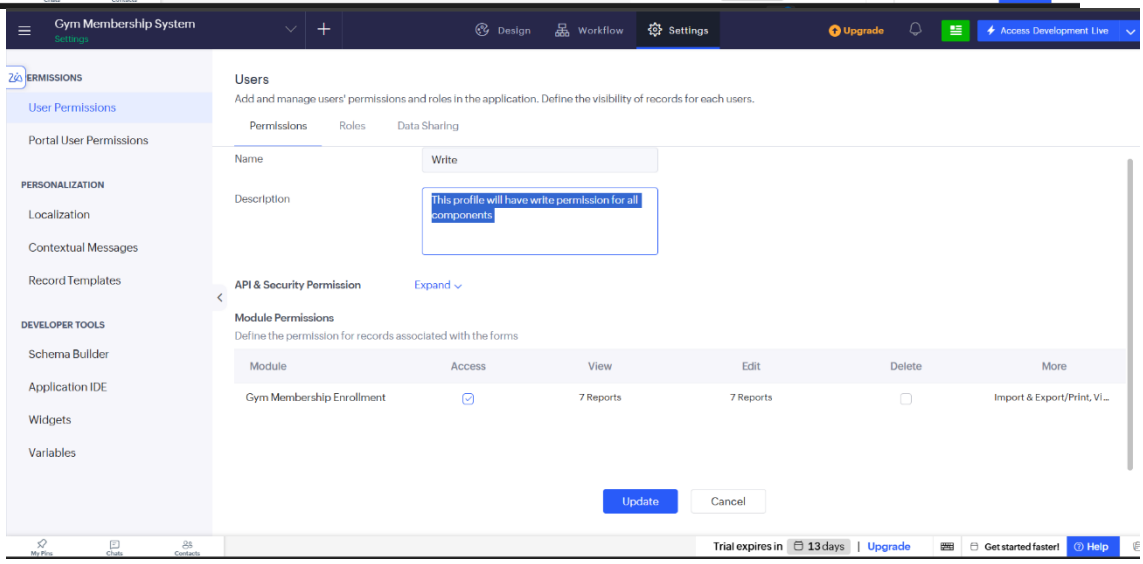

Procedure

1. Log in to Zoho Creator and open the existing Gym Membership Management application.
2. Navigate to **Settings** in the application editor.
3. Open **User Permissions** to manage application permissions and roles.
4. 4. Select the Roles tab and verify the available roles, such as Admin, Gym_Staff, and Viewer.
5. Open the **Permissions** tab to view the existing permissions, such as Read and Write.
6. 6. Open the Read permission and examine the module permissions for Gym_Membership_Enrollment.
7. Configure viewing permissions to allow authorized users to access gym membership records and reports.
8. Configure editing and deletion permissions according to each user's responsibilities.
9. Assign the appropriate permissions to the respective roles, using the options available in Zoho Creator.
10. Save the permission settings and verify the role configuration.
11. Test the configured permissions to ensure that users can access only the functions permitted for their roles.

Help

Result

Thus, Role-Based Access Control was configured in Zoho Creator to manage user roles and permissions for the Gym Membership Management application, helping control access to membership records and application features.
